

Want Clear, Porcelain Skin, Like a China Doll?

The China Doll Rejuvenation treatment is a complexion toning laser, paired with a medical-grade carbon serum to enhance the laser's ability to create clear, porcelain, doll-like complexion for your skin.

How does China Doll Rejuvenation work?

China Doll Rejuvenation is a non-invasive, gentle treatment consisting of a state-of-the-art Q-switched Nd-Yag Laser paired with a medical-grade carbon serum. The serum maximises the laser's capability for the destruction of debris clogged in the pores and upper layers of skin, as well as for treating minor skin imperfections, giving skin a glow from within.

The China Doll Rejuvenation treatment, also known as 'Carbon Laser Skin Rejuvenation' or 'China Doll Peel' is very popular in Asia, and has been the treatment of choice by Asian celebrities.

What skin conditions does it work best on?

- Dull skin * Large and congested pores *Active acne (including blackheads and whiteheads)
- Uneven texture *Fine lines and wrinkles *Pigmentation *Surface acne scars *Mild redness

The results you can expect

An immediate clean and clearer complexion can be achieved after just one treatment and you can expect to see subtle, yet cumulative results with skin imperfections after each treatment.

Get the clear, porcelain-like skin you've always wanted

If you are suffering from conditions such as dull skin, enlarged and congested pores, active acne, surface acne scarring, pigmentation, fine lines and mild redness, then the China Doll Rejuvenation treatment is an excellent option.
