Riana's Health Skin Care Clinic

## MULTIPLE BENEFITS

The renowned LAMPROBE has become exceptionally popular amongst skin care practitioners - from licensed aestheticians to medical aesthetic professionals - for the same universal reasons:

- **The LAMPROBE treats common minor skin conditions, on the surface of the skin that skin care practitioners see on a daily basis.**
- **The LAMPROBE treats these superficial common irregularities NON-invasively and extremely rapidly (3-5 sec), without the need of anaesthesia.**
- **The LAMPROBE delivers instantaneous results, in one treatment only.**
- **The LAMPROBE works effectively on all Fitzpatrick skin types, across all skin tones and ethnicities.**
- **The LAMPROBE uniquely assists modern, capable, and skilled skin care practitioners to do their work more effectively and with greater professional satisfaction.**
- **The LAMPROBE enables professional skin care practitioners to successfully service increasing client demands regarding minor superficial, but perhaps personally bothersome, aesthetic-oriented skin conditions.**
- **Rapid treatment with instantaneous results.**
- **The LAMPROBE 4000 is a unique instrument for the effective treatment of a wide range of common minor skin irregularities. LAMPROBE treatments are exceptionally quick (3-5 seconds), with instantaneous results. One treatment only is required.**

# Lamprobe for all skin abnormalities

Riana's Health Skin Care Clinic

- **Skin conditions effectively treated by the LAMPROBE include: telangiectasia, milia, cholesterol deposits, clogged pores, cherry angiomas, spider naevi, skin tags, fibromas, pimples and acne.**
- **Non-invasive with minimum discomfort**
- The astounding LAMPROBE, developed by Hubert Lam, uses radio frequency technology to treat minor skin abnormalities, without penetrating the skin's surface. The discomfort level experienced by the client is tolerable, with the sensation produced feeling much like a tight pinch to the skin. Sensitive skins, thin skins, and aging skins can also be comfortably treated and intensity settings adjust easily. No anaesthesia is required.
